Duet® Ruby Red Laser Pointer

Red - 635nm (Ruby Series)

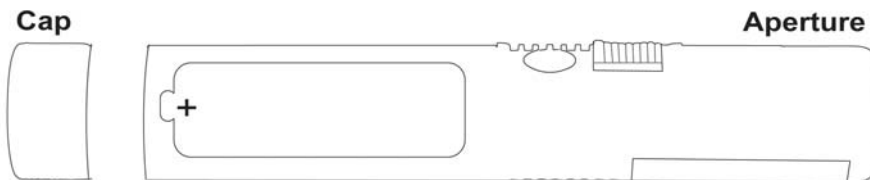

Design & Operation

The Duet® Ruby is truly innovative. Most laser pointers have either a momentary push button or constant on click switch for hands free operation. The Duet® Ruby has both. The oval button is a momentary pressure switch for hand held pointing; the square button slider switch allows for hands free use.

The unit emits the highest power 635nm red laser light. Projects a brilliant ruby red laser dot. No comparison to cheaper 645~650nm red laser pointers - the Duet® Ruby is twice as bright - visible range of 4,500 ft. (Night) The red laser module operates on 1 pc CR123A lithium battery for superior battery life - forty (40) hours constant on operation!

The Duet® Ruby is the product of new design technologies and manufacturing efficiencies. Red laser is eye safe - IEC Class 3R and FDA Class IIIa. Ships with free Z-Bolt® lanyard for neck or wrist, black nylon belt carry pouch (MOLLE Style) Beautiful "hot rod" red finish - constructed of long lasting anodized aluminum.

Batteries

Remove Cap. Insert CR123A or equivalent with (+) Tip toward cap. Replace Cap. Do not attempt to remove aperture; voids warranty.

Box Contents - Features

- Special Switch Function - Constant On/Off & Push Button
- Battery Life - Forty (40) Hours Constant On Operation
- Power Source - 1pc CR123A (Included)
- Hands Free Operation, Hand Held Use
- Nylon Belt Carry Pouch (MOLLE Style)
- 36" Red Nylon Z-Bolt® Lanyard
- User Guide & Specification Card
- Anodized Aluminum Casing
- Jet Black Finish

Laser Specifications

- Length 4.45 in. x Diameter 0.75 in. (113 mm x 19 mm)
- Wavelength (Color) - 635 nm (Ruby Red)
- Diode Operating Life - 3,000 to 5,000 Hrs
- Diode Circuit - Computerized APC
- Beam Diameter at Source - 1.1 mm
- Output Mode - Constant Wave
- Output Power - 3.0 ~ 5.0 mW
- Range (Night) - 4,500 ft.
- FDA Safety Class - IIIa
- ANSI Safety Class - 3R
- Warranty - 1 Year
