The professional choice in premium laser products

RSA-10

6", 15" & 30" Remote Cable Switches

Lithium Powered Laser Compatibility

Specification - Type

Z-Bolt® RSA-10 Remote cable switches to activate green laser pointer without touching telescope when aligned as a star finder. Prevents unwanted movements that affect delicate finder alignments. For use with green lasers in finder mounts and alignment setups.

Designed for the outdoors; rugged and reliable; dirt and moisture resistant. Cable switch can be "velcro" attached to telescope body; or allowed to dangle freely. These remote switches are designed to fit Z-Bolt® CR123A Lithium Powered Green & Red Laser Pointers. Choose from three (3) length (6", 15" & 30") variants to match your particular "hands free" set up and configuration.

Tape Switch Lengths - 6, 15 & 30 Inches
Remote Cable Switch Design
Two Sided Velcro Tape
Protects Finder Alignment
